

GOVERNMENT DEGREE COLLEGE NOWSHERA
DISTRICT RAJOURI UT OF J&K
Affiliated to the University of Jammu (Estd,2008)

DEPARTMENT OF GEOGRAPHY

HISTORY OF DEPARTMENT

The department was established in the year 2018 after the introduction of science stream in the college. In the session 2018 - 19 seventy five students got enrolled in geography and the strength of the students increased in every new session.

PROGRAMME SPECIFIC OUTCOMES

Geography is the study of places and the relationships between people and their environments. Geographers explore both the physical properties of Earth's surface and the human societies spread across it. They also examine how human culture interacts with the natural environment and the way those locations and places can have an impact on people. Geography seeks to understand where things are found, why they are there, and how they develop and change over time. The study of the diverse environments, places, and spaces of Earth's surface and their interactions. It seeks to answer the questions of why things are as they are where they are. The modern academic discipline of geography is rooted in ancient practice, concerned with the characteristics of places, in particular their natural environments and peoples, as well as the relations between the two. This programme in geography is tailored to meet the students' specific educational and professional goals in mind. It focuses on spatial studies, qualitative as well as quantitative, and emphasises on human-environment relationship. During the first year of the programme, the students are trained on concepts of Geomorphology. In the second year students will learn about Oceanography and Climatology. The third year allows them to concentrate on specific areas of the subject, on which they complete their field reports. After completing the course, the students will be amply prepared for professional careers in geography and allied disciplines like GIS and Remote Sensing. They will also be able to pursue M.A. /M.Sc. Course in Geography.

OUTCOMES

- To understand the scope and evolution of the diverse discipline of Geography. • Recognize, synthesize and evaluate diverse sources of knowledge, arguments and approaches pertinent to exploring human-environment problems. Explain societal relevance of geographical knowledge and apply it to real world human-environment issues.
- Appreciate and reflect critically on the importance of holistic and interpretative human- environment perspectives.

- An understanding and acknowledgment of the threats that endanger the earth's natural systems. This helps in further realization of the significance of anthropogenic causes of many of the disasters and threats that puts life on this planet on the edge.
- Development of knowledge, skills and holistic understanding of the discipline among students. Encouragement of scientific mode of thinking and scientific method of enquiry in students.

FACULTY DETAILS
